Examiner Comment regarding Rule 173 and Claim 12

Regarding the status identifier of claim 12, i.e., "(Thrice Amended)," the examiner is aware that the current text of reissue application claim 12 is identical to that of the patent. Accordingly, pursuant to 37 CFR 1.173(d),<sup>1</sup> no text of claim 12 is underlined or enclosed in brackets. The rule governing provision of the "parenthetical expression," a.k.a., claim status identifier, in reissue applications, 37 CFR 1.173(b)(2),<sup>2</sup> states in pertinent part that "[f]or any claim changed by the amendment paper, a parenthetical expression 'amended,' 'twice amended,' etc., should follow the claim number." Notwithstanding the fact that the current text of claim 12 is identical to that of patent claim 12, the parenthetical expression "(Thrice Amended)" for claim 12 is proper

---

<sup>1</sup> § 1.173 Reissue specification, drawings, and amendments.

(d) *Changes shown by markings.* Any changes relative to the patent being reissued which are made to the specification, including the claims, upon filing, or by an amendment paper in the reissue application, must include the following markings:

(1) The ***matter to be omitted by reissue must be enclosed in brackets;*** and

(2) The ***matter to be added by reissue must be underlined,*** except for amendments submitted on compact discs (§§ 1.96 and 1.821(c)). Matter added by reissue on compact discs must be preceded with "<U>" and end with "</U>" to properly identify the material being added.

(emphasis added)

<sup>2</sup> § 1.173 Reissue specification, drawings, and amendments.

...

(b) *Making amendments in a reissue application.* . . . If amendment is made by an amendment paper, the paper must direct that specified changes be made, as follows:

...

(2) *Claims.* An amendment paper must include the entire text of each claim being changed by such amendment paper . . . For any claim changed by the amendment paper, a parenthetical expression "amended," "twice amended," etc., should follow the claim number. . . .

because the text of claim 12 has changed three times during the course of this reissue prosecution, as shown *infra*. Patent claim 12 issued as:

**recs.**

**12. A screen cylinder according to claim 11 wherein said slots have an extent sufficient to span, continuously and without interruption, in the axial direction two or more recesses.**

**... according to claim 11 wherein**

On Sept 13, 2003, claim 12 was first amended in this reissue application to:

12. (Currently Amended) A screen ~~cylinder~~plate according to claim 11 wherein said slots have an extend sufficient to span, continuously and without interruption, in the axial direction two or more recesses.

On May 5, 2006, claim 12 was amended a second time to:

12. (Twice Amended) A screen cylinder according to claim 11 wherein said slots have an [extend] extent sufficient to span, continuously and without interruption, in the axial direction two or more recesses.

On Feb. 13, 2007, claim 12 was amended a third time amended to its current text:

12. (Three Amended) A screen cylinder according to claim 11 wherein said slots have an extent sufficient to span, continuously and without interruption, in the axial direction two or more recesses.

Accordingly, claim 12 as written complies with 37 CFR 1.173(b)(2) and 1.173(d).

Examiner Comment Regarding Supplemental Oath filed 3/12/07

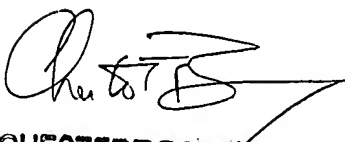

The oath filed 3/12/07 was of poor, but not fatal, legibility. Assignee is neither required nor requested to file via hard copy mail a more legible copy of the very same Supplemental Oath filed 3/12/07 even if one is readily available. Doing so would probably only unnecessarily delay issuance of the reissue patent.

The examiner notes that the Supplemental Oath filed 3/12/07, a pertinent part of which appears immediately below,

Original patent claim 15 failed to particularly point out and distinctly claim the invention insofar as original claim 10 did not provide adequate antecedent basis for "said cylindrical screening" and for "said backing cylinder."

states:

Original patent claim 15 failed to particularly point out and distinctly claim the invention insofar as original claim 10 did not provide adequate antecedent basis for "said cylindrical screening" and for "said backing cylinder."
